

Hunter ProSprays

Applications: Direct drive vane axial fans. These totally enclosed/air oven motors must be mounted within the airstream for proper cooling.

- Features:**
- Capacitor start design for high starting torque
 - Double sealed ball bearing
 - Heavy gauge steel frame and base
 - 56Z & 143-5TZ have keyway and 1.4" X 20"
 - 18" leads for ease of connection
 - Automatic reset thermal protector
 - 1.15 Service factor
 - UL Recognized and CSA Certified

Hunter 3/4" PGP & I20 Motors

Applications: Belted and direct drive attic fans where the motor is placed within the airstream and low to moderate torque is required. Intended for use in relative clean and dry environments.

- Features:**
- Variable torque on two speed motors
 - Economical split phase design
 - Quiet, all angle sleeve bearings
 - Heavy gauge steel frame and resilient, "cradle" style base
 - Wiring entrance at shaft end
 - 56YZ frame with 3" shaft height, 1.2" diameter shaft, and 5/8" adapter with keyway included
 - 1.0 Service factor
 - UL Recognized and CSA Certified

Hunter Inst, SRS & PS Sprays

Mechanical Features:

Open drip-proof construction with cooling air exhausts at the shaft and for maximum cooling. Oversized locked bearing on shaft end limits axial shaft movement. A drip cover is supplied with 143-5T and 213T steel frame motors, for use when mounting the motor vertically with rigid base. Drip covers for 182-4T frame motors have enclosed end shields as standard with vents meeting 12" drip-proof requirements.

Hunter Spray Nozzles

General Specifications:

Designed for continuous duty service on close-coupled pumps using NEMA LM provisions. All motors have a rigid mounting base and NEMA JM pump shaft

Electric Features:

High efficiency copper windings with NEMA 1.15 service factors. UL and CSA recognized designs
